

DISCONNECT STICKS (ไม้ชักไฟฟ้า)

Used on Cutouts, Disconnect Switches

Disconnect sticks provide insulation safety for linemen in opening and closing disconnect switches and cutouts. They are also used for installing and removing open-link fuse links. Poles are made of Epoxiglas NEMA standard heads of cast bronze for using with switch head, disconnect head, or spliced disconnect head.

Spliced Disconnect Sticks

For convenience in transporting and/or where greater length is required, Spliced Disconnect Sticks are available, the splice is strong and rigid...easy to put together and easy to take apart. The taking-down feature of these sticks makes them especially handy to carry on line trucks or in tool trailers.
